

Flexible Plastic Tubing Coil

This flexible plastic tubing is coiled for easy storage and deployment. It is suitable for various fluid transfer applications, providing a reliable and durable solution.

Product Overview

Versatile Fluid Transfer Solutions

This flexible plastic tubing coil is engineered for reliability in diverse plumbing, irrigation, and fluid transfer applications. Available in a variety of high-performance materials including multi-layer composite and cross-linked polyethylene, it offers exceptional durability and resistance to stress. Designed to meet international standards, these pipes ensure a consistent, leak-free flow for demanding professional installations.
