Product Overview

Industrial Flexible Ventilation Ducting

This flexible PVC ducting is engineered for efficient air supply and exhaust in confined spaces, making it ideal for welding fume extraction, ship building, and manufacturing environments. Constructed from fire-resistant fabric and supported by a robust helix steel wire, the duct offers excellent durability while remaining lightweight for easy installation. Each unit comes with a convenient carry bag, allowing the duct to be compressed for space-saving transportation and storage.

Technical Specifications

Dimensions

300 mm
Diameter

2 m
Length

Operating Temperature

-20 to 80°C

Material Characteristics

Fire-resistant, Oleic acid proof, Wear-and-tear proof, Flexible

Ordering Information

Availability

- Custom sizes available upon request
- OEM service available
- Available in Yellow, Orange, Green, Red
