

Flexible Refrigeration Ventilation Tubing

Flexible tubing is designed for refrigeration and ventilation systems. Its durable construction allows for easy installation and secure connections in air conditioning, refrigeration, and ventilation setups.

Product Overview

Flexible Refrigeration and Ventilation Tubing

This high-quality, flexible tubing is engineered specifically for demanding refrigeration and ventilation applications. Designed for seamless integration into air conditioning and climate control systems, it facilitates efficient fluid or gas transfer with leak-proof reliability. Its durable, pliable construction allows for straightforward installation and routing, even within the most confined and complex spaces.

Technical Specifications

Installation Features

- Highly flexible material
- Easy routing in tight spaces
- Integrated connector at one end
- Secure fastener-based storage

Design Advantages

Leak-proof • Durable • Flexible

Applications

Refrigeration, Ventilation, Air Conditioning

Color

Yellow
