

Flexible Resin Polishing Pad

These polishing pads feature a flexible resin bond. They are available in various grits for coarse grinding to fine finishing.

Product Overview

Flexible Resin Polishing Solution

These resin-bonded flexible diamond polishing pads are engineered for professional-grade grinding and polishing of marble and granite surfaces. Featuring a high-performance segmented design, these pads provide excellent flexibility and improved cooling during operation. The system utilizes a durable velcro backing and is compatible with snail or M14 connections, ensuring seamless integration with standard professional equipment.
