

Flexible Shaft Water Pump

This versatile water pump is designed for various applications. It features a flexible shaft for ease of use in different environments.

Product Overview

Versatile Flexible Shaft Water Pump

The RB Series flexible shaft water pump is designed for high-performance fluid transfer across various demanding environments. Engineered for reliability, it is available in three distinct models to accommodate specific discharge requirements, head pressures, and flow capacities. With durable pump head options in plastic or aluminum, this equipment provides robust versatility for professional onsite operations.

Technical Specifications

Model Performance

Model	Discharge (mm)	Head (m)	Flow (m³/h)	Matched Power (HP)
RB80	80	12	40	5.5-6.5
RB60	60	10	60	3.5-5.5
RB50	50	6	8	3.5-5.5

Available Materials: Plastic, Aluminum

Operational Details

Weight Specs (for 6m shaft)

14.5 kg

Min Net Weight

17 kg

Max Net Weight

Hose Length

4m - 10m
