

Flexible Side Bow Conveyor Chain

Side bow chains are specialized conveyor chains designed for flexible and curved conveying systems. These chains feature a unique construction allowing them to navigate bends and turns without the need for transfer points.

Product Overview

Flexible Side Bow Conveyor Chain

This flexible side bow conveyor chain is engineered for high-performance logistics and automated transportation lines. Its unique design allows for seamless navigation through curves and complex layouts, effectively eliminating the need for additional transfer points. Built with high-quality materials to meet OEM standards, this chain ensures durability and reliable performance in demanding industrial material handling and packaging environments.

Key Features

Characteristics

Lateral Flexibility, OEM Quality, Curved Conveying, Logistics Automation

Application

Industry Applications

- Material Handling
- Packaging Lines
- Assembly Lines
- Automated Logistics
