

Flexible Silicone Rubber Tubing

This silicone rubber tube is extruded from a soft and flexible elastomer. It offers excellent abrasion and kink resistance with good strength and flexibility.

ADDITIONAL IMAGES

Product Overview

High-Performance Flexible Silicone Tubing

This silicone rubber tubing is extruded from a premium, soft elastomer designed for exceptional flexibility and kink resistance. It offers superior strength and durability, making it suitable for demanding applications in the medical, food, and dairy industries. Its non-tainting properties ensure that it maintains product purity, while its chemical resistance profile allows it to withstand various solvents, oils, and acids.

Physical Properties

Flexibility Level	High flexibility and kink resistance
Inner Bore Finish	Smooth inner bore for efficient flow

Chemical Resistance

Resistant Substances	Solvents, Oils, Concentrated Acids, Diluted Sodium Hydroxide
----------------------	--

Applications

Industry Applications

- Medical Field
- Food Industry
- Dairy Industry
- Fluid Handling
- Electrical Insulation
- Protective Sleeving

Compliance & Performance

Key Attributes

Abrasion Resistant • Non-Tainting • Weather Resistant • Temperature Resistant
