Product Overview

Industrial Ventilation Solution

This flexible ventilation duct is engineered for high-power ventilation in demanding mining and tunneling environments. Constructed with double-skin coated biaxial polyester, it offers exceptional durability, anti-static properties, and resistance to fire, chemicals, and extreme temperatures. Featuring a modular zipper and Velcro coupling system, it ensures secure connections and easy installation to maintain safe air quality.

Technical Specifications

Available Lengths

- 5m
- 10m
- 15m
- 20m

Design Features

Lay-flat • Lightweight • Hanging fin with eyelet • Customizable diameter

Material Characteristics

Biaxial Polyester, Anti-static, Fire-resistant, Waterproof, Oleic acid proof, Shockproof

Connection Type

Zipper and Velcro coupling

Commercial Terms

Minimum Order Quantity

100

Payment Terms

50% deposit, 50% balance before shipment

Service Availability

OEM Service, Small test orders accepted
