

Flint Sandpaper for Woodworking

This sandpaper is suitable for grinding wood and bamboo. It is made with glass or flint sand and comes in multiple sizes and grits.

Product Overview

Professional Woodworking Flint Sandpaper

This dry glass and flint sandpaper is specifically engineered for high-quality grinding of wood and bamboo surfaces. Utilizing a durable B or C-weight paper backing with a reliable glue bond, it provides consistent performance for various sanding stages. Available in a wide range of grits and formats, it is suitable for both manual sheet use and industrial roll applications.
