

# Float Ball Valve, 1/2 and 3/4 inch, Brass

This float ball valve is designed for controlling water levels in tanks and reservoirs. It features a durable brass body, float arm, and plastic float, available in 1/2" and 3/4" sizes.

Float Ball Valve	
Code	Spec.
G00013	1/2" High Pressure Part 2 Brass
G00014	3/4" High Pressure Part 2 Brass
G00015	1/2" Low Pressure Part 2 Brass
G00016	3/4" Low Pressure Part 2 Brass

## ADDITIONAL IMAGES

## Product Overview

### Professional Fluid Control Solution

This float ball valve is engineered for precise water level regulation in tanks and reservoirs. Constructed from durable brass, it offers reliable automatic shut-off performance suitable for HVAC, plumbing, and industrial fluid control systems. Available in both 1/2-inch and 3/4-inch sizes, this component is designed to meet rigorous standards for efficiency and longevity.

## Technical Specifications

### Pressure Options

High Pressure • Low Pressure

### Available Sizes

1/2 inch, 3/4 inch

### Material

Brass

## Product Models

### Model Specifications

Code	Size	Pressure Type
G00013	1/2"	High Pressure
G00014	3/4"	High Pressure
G00015	1/2"	Low Pressure
G00016	3/4"	Low Pressure

## Applications

### Suitable Applications

- HVAC&R Systems
- Plumbing Applications
- Industrial Fluid Control
- Tank Water Level Regulation
