

# Floor Deck Roll Forming Machine

This floor deck roll forming machine is designed for manufacturing construction materials. It features a robust build and a roll forming system for producing floor decks with precision and efficiency.

## Overview

### High-Efficiency Floor Deck Roll Forming Machine

This professional-grade roll forming machine is engineered for the high-volume production of colored glaze steel roof tiles and floor decks. Built for durability and precision, it features a robust 15KW motor and is capable of handling PPGI/GI materials to create high-strength structural sheets. Designed for industrial reliability, this machine offers an efficient solution for large-scale construction material manufacturing.

## Technical Specifications

### Power Rating

**15 KW**

Power

**380 V**

Voltage

### Machine Dimensions

16000 x 1200 x 1100 mm

### Machine Weight

15 t

## Operational Details

### Key Features

- High Rib roofing profile capability
- Easy to operate control system
- Compatible with PPGI/GI materials
- Produces high strength sheets

### Production Capacity

100%

## Compliance & Support

### Warranty & Support

Service Type	Details
Warranty	1 Year
After-sales	Engineers available for overseas service

### Certifications

BV Certified, New Condition
