

Floor Standing Air Conditioner

This floor-standing air conditioner is designed to provide cooling in residential or commercial spaces. It features a vertical design with air vents at the top for efficient air circulation.

Product Overview

Versatile Cooling Solution

This floor-standing air conditioner is an efficient cooling solution designed for both residential and commercial environments. Its vertical design optimizes floor space while providing powerful air circulation through top-mounted vents. The unit features a centralized control panel for easy operation and a sleek white finish that integrates seamlessly into modern interiors.
