

Floor Standing Air Conditioner with Sterilization

This floor-standing air conditioner is designed for residential use. It features advanced sterilization technology, multi-layer filtration, smart temperature control, and quiet operation.

Product Overview

Advanced Climate Control and Air Purification

This floor-standing air conditioning unit combines powerful cooling performance with advanced health-focused air treatment. Designed for large spaces, it ensures a comfortable environment through intelligent air zoning and wide-angle airflow. Integrated sterilization technologies provide peace of mind by actively improving indoor air quality alongside temperature regulation.

Air Quality & Sterilization

Sterilization Technologies	UVC Safe Sterilization, 56°C High-Temperature Sterilization
Air Quality Monitoring	Yes

Performance & Airflow

Ventilation System	Two-way fresh air ventilation
Air Supply Angle	130 degrees
Heat Exchange Efficiency	Efficient all heat exchange system

Smart Features

Intelligent Features

- Air zoning by intelligent infrared human body induction
- Smart temperature control
