Overview

Advanced Air Purification Solution

This floor-standing air purifier is designed to significantly improve indoor air quality for residential and commercial environments like offices and hotels. It features a robust multi-stage filtration system, including HEPA and activated carbon options, to effectively remove airborne pollutants. With intelligent sensor controls, quiet operation, and versatile speed settings, it provides a seamless and user-friendly experience.

Performance & Filtration

Clean Air Delivery Rate

510 m³/h
CADR

300 CFM
CADR

Filtration Efficiency

Filter Type	Efficiency
HEPA Filter	99.5-99.97%
Activated Carbon (Formaldehyde)	95%
VOC Filter	93%

Advanced Features

UV Lamp, Nano Photocatalyst, Negative Ions (>3 million/cm³), Intelligent Sensor Control

Technical Specifications

Power Requirements	75 W
Rated Voltage	AC100V - 240V
Dimensions	624 x 396 x 146 mm

User Interface & Control

Control Methods

- Remote Control
- Intelligent Sensor Control
- LCD Display

Applications

Recommended Environments

Home • Office • Hotel
