

# Floor-Standing Drill Press for Metalworking

This floor-standing drill press is designed for precision drilling applications. It features a robust construction with a sturdy base, adjustable worktable, and a drill head assembly.

## Overview

### Precision Metalworking Performance

This floor-standing drill press is engineered for professional metalworking environments, offering a robust and stable platform for high-precision drilling operations. Featuring a heavy-duty construction with a height-adjustable worktable, it provides the versatility needed for various materials and project scales. The integrated drill head assembly includes intuitive controls for speed and depth, ensuring consistent accuracy and operational safety for demanding industrial tasks.

## Technical Specifications

Machine Type	Floor-Standing Drill Press
Primary Application	Metalworking, Industrial Drilling, Precision Engineering

## Key Metrics

### Operational Metrics

**50 Hz**

Frequency

## Design Features

### Construction Highlights

- Robust floor-standing base
- Vertical support column
- Height-adjustable worktable
- Integrated motor and drill head assembly
