

Floor-Standing Home Audio Speakers

These floor-standing speakers provide full-range audio reproduction. The speaker cabinet is constructed from wood with a dark wood grain finish.

Product Overview

High-Performance Floor-Standing Audio

The EM-2189FT floor-standing speaker system delivers a robust 160W of output power, designed for immersive home audio experiences. Featuring a sophisticated driver configuration including dual woofers, mid-range drivers, and tweeters, it ensures full-range sound reproduction. With versatile connectivity options like Bluetooth, USB, and AUX, this system is built to serve as the centerpiece of any modern home entertainment setup.
