

Floor-Standing Home Theater Speakers

These floor-standing speakers provide high-quality audio for an immersive listening experience. The multi-driver configuration includes a woofer, mid-range driver, and tweeter, all housed in a resonance-minimizing enclosure.

Product Overview

High-Performance Floor-Standing Audio

The EM-2082FT floor-standing speaker system is engineered to provide a comprehensive home theater audio experience with a robust 100W output. Its multi-driver configuration, featuring dedicated woofers, mid-range drivers, and tweeters, ensures balanced sound reproduction across the frequency spectrum. Designed with a modern aesthetic, this system integrates seamlessly into various home environments while offering versatile connectivity options for diverse media sources.
