

Floor-Standing Home Theater Speakers

These floor-standing speakers provide a powerful audio experience with a sleek, modern design. The speakers feature multiple drivers, including tweeters, mid-range drivers, and a side-firing subwoofer, delivering a wide frequency response and deep bass.

Product Overview

High-Fidelity Floor-Standing Audio

The EM-2089FT floor-standing speakers are designed to deliver a powerful and immersive audio experience, making them an ideal choice for home theater setups. Featuring a multi-driver array including dedicated tweeters, mid-range drivers, and subwoofers, these speakers provide a wide frequency response and deep, resonant bass. The robust enclosure construction minimizes distortion, ensuring clear and accurate sound reproduction for music enthusiasts and movie lovers alike.
