

Floor-Standing Home Theater Speakers

These floor-standing speakers are designed for home entertainment systems. They feature a multi-driver configuration and a bass reflex port for enhanced audio performance.

Overview

High-Fidelity Home Entertainment

The Artemis (EM-1086FT) is a sophisticated floor-standing speaker system designed to deliver premium audio performance for home theater enthusiasts. Featuring a multi-driver configuration and a dedicated bass reflex port, these speakers provide a rich, full-range sound profile with enhanced low-frequency response. The sleek aesthetic, combining wood grain and silver finishes, ensures they complement modern interior designs while providing clear digital feedback via an integrated display.
