

Floor Standing Split Air Conditioner

This air conditioner is a split system with a floor-standing indoor unit. It includes an outdoor unit and a remote control.

Product Overview

Versatile Climate Control Solution

This floor-standing split air conditioner system provides efficient cooling and heating for large indoor spaces. The set includes a sleek indoor tower unit designed for optimal air distribution and a durable outdoor condenser unit. With an included remote control, users can easily manage temperature settings and airflow from a distance, making it ideal for both commercial and residential environments.
