

Floor Surface Cleaning Machine

This cleaning machine is designed for maintaining and cleaning various floor surfaces. It features a robust construction with a circular base for stability and a cylindrical motor housing.

Product Overview

Professional Floor Maintenance

This floor surface cleaning machine is engineered for high-performance maintenance across various commercial and industrial environments. Featuring a robust, stable circular base and a powerful motor housing, it ensures consistent cleaning results on diverse floor types. Designed with operator ease in mind, the unit includes an ergonomic handle for superior maneuverability and control during operation.

Technical Specifications

Power Source	Electric (Corded)
Application	Industrial, Commercial

Design Features

Build Quality

Robust Construction • Stable Circular Base

Usability

- Easy-grip handle
- High maneuverability
- Integrated motor housing
