

Flour Milling Machine

This machine grinds grains into high-nutrient flour, adjustable from 10-100 mesh. It ensures minimal residue and high success rates.

Product Overview

High-Efficiency Flour Milling Solution

This industrial-grade flour milling machine is engineered for producing full nutrition flour by processing various grains effectively. It features an advanced water-cooling system and integrated cyclone separator for efficient dust collection and clean air exhaust. Designed for versatility, it handles unlimited feed-in granularity and moisture content, making it an ideal choice for professional milling operations.

Performance Metrics

Key Performance Metrics

| Model | Power (kW) | Speed (/min) | Weight (kg) |
|---------------------|------------|--------------|-------------|
| 300 | 5.5 | 3860 | 400 |
| 400 | 11 | 2900 | 600 |
| 500 (Water-cooling) | 15 | 2900 | 900 |
| 700 | 22 | 2400 | 1200 |
| 800 | 30 | 2200 | 1500 |

Technical Specifications

Dimensions (m)

- Model 300: 2.8 x 0.6 x 1.9
- Model 400: 4 x 1 x 2.4
- Model 500: 4 x 1 x 2.5
- Model 700: 4.8 x 1 x 2.6
- Model 800: 5 x 1 x 2.65

| | |
|-------------------------|-----------|
| Thin Degree (Eye) | 10-3000 |
| Feed-in Granularity | Unlimited |
| Water Content Tolerance | Unlimited |
