Product Overview

Industrial Flour Milling Solutions

This comprehensive flour milling plant is engineered for high-efficiency processing of wheat and maize. The system integrates multiple stages, including cleaning, grinding, and sifting, to ensure consistent particle size, high purity, and optimal flour yield. Designed for continuous industrial operation, the plant features a modular construction that allows for customization to meet specific production requirements.

Processing Capabilities

Processing Stages

- Cleaning
- Grinding
- Sifting
- Pneumatic Conveying

Compatible Grains

Wheat, Maize, Corn, Rice

Service & Support

Project Scope

Turnkey Project • Custom Design • Installation • Commissioning • Worker Training

Warranty & Support

- 1-year quality guarantee
- 1-year free spare parts
- Lifelong technical service
