

Fluid and Gas Control Ball Valve

This ball valve is designed for on/off control of fluids and gases. It features a durable construction with a metallic body and a lever handle for easy operation.

Overview

Versatile Fluid and Gas Control

This ball valve is engineered for reliable on/off control of various fluids and gases in industrial and commercial applications. Built with a durable metallic body and an ergonomic lever handle, it ensures easy operation and long-term performance. The design prioritizes a tight seal when closed and maintains minimal pressure drop when fully open, offering an efficient and cost-effective solution for flow management.

Technical Specifications

Functionality	On/Off Control
Compatible Media	Fluids, Gases
Body Material	Metallic

Features

Key Features

- Durable metallic construction
- Easy-to-use lever handle
- Tight sealing mechanism
- Minimal pressure drop
- Simple installation and maintenance

Maintenance

Low Maintenance • Easy Installation
