

Fluid Circulation Water Pump

This water pump is designed for efficient fluid circulation. Its robust impeller ensures optimal flow rate, while its durable housing guarantees long-lasting reliability.

Product Overview

High-Performance Circulation Pump

This industrial-grade fluid circulation water pump is engineered for superior efficiency and operational reliability. It features a robust impeller designed to maintain optimal flow rates in demanding environments. Built with a durable, long-lasting housing, this pump is well-suited for a wide range of intensive automotive and industrial cooling or fluid transfer applications.

Technical Specifications

Key Features

- Robust impeller design
- Optimal fluid flow rate
- High-durability housing
- Industrial-grade reliability

Model Identifiers

064 134, SAN GONG

Application Data

Recommended Applications

Industrial Cooling • Automotive Fluid Systems • General Fluid Circulation
