

Fluid Control Ball Valve with Hose Barb

This ball valve is designed for reliable shutoff and control of fluid flow. It features a durable metal body and a smooth-operating ball mechanism for tight sealing.

Product Overview

Reliable Fluid Flow Control

This fluid control ball valve is engineered for efficient shutoff and precise flow regulation in various industrial and residential systems. Featuring a robust metal body and a smooth-operating ball mechanism, it ensures a tight, leak-free seal during operation. The design incorporates a convenient lever handle for quick manual control, making it an ideal solution for applications requiring reliable performance.

Technical Specifications

Inlet Connection	Threaded
Outlet Connection	Hose Barb
Body Material	Metal (Brass/Stainless Steel)
Barb Material	Durable Plastic

Features

Control Type

Manual Lever Handle • Ball Valve Mechanism

Ideal Applications

Industrial, Residential, Fluid Control, Flow Shutoff
