

Fluid Flow Control Ball Valve

This ball valve is designed for on/off control of fluid flow. It features a durable metal body with a smooth, quarter-turn operation via a lever handle.

Product Overview

Reliable Flow Control Solution

This Fluid Flow Control Ball Valve is engineered for precise on/off regulation of fluid systems. Featuring a robust metal body construction, it ensures durability and long-term performance in demanding environments. The design incorporates a smooth, quarter-turn lever handle for intuitive and rapid operation, while threaded connections provide a secure, leak-proof installation for various industrial applications.

Technical Specifications

Operation	Quarter-turn lever handle
Connection Style	Threaded
Body Material	Durable Metal

Key Features

Key Benefits

- Reliable on/off fluid control
- Secure leak-proof installation
- Durable metal construction
- Intuitive quarter-turn operation
