

Fluid Reservoir Tank

This metal fluid reservoir tank is equipped with a silver cap and a side-mounted outlet. It features a mounting bracket at the bottom for secure installation in automotive or industrial applications.

Product Overview

Industrial Fluid Reservoir Tank

This industrial-grade fluid reservoir tank is engineered for robust storage and distribution of automotive or industrial fluids. Featuring a durable metallic construction and a secure silver cap, the tank is designed for reliable performance in demanding environments. It includes an integrated mounting bracket and a precision-engineered side-mounted outlet with a flanged nozzle for seamless system integration.

Technical Specifications

Material	Metal
Finish	Red

Design Features

Outlet Configuration

- Side-mounted
- Flanged connection
- Protruding nozzle

Mounting	Bottom-mounted bracket
