

Fluid Transfer Centrifugal Pump

This centrifugal pump is designed for various fluid transfer applications. It is constructed with durable materials for longevity and resistance to corrosion.

Product Overview

High-Performance Fluid Transfer

This centrifugal pump is engineered for reliable and consistent fluid transfer across industrial, commercial, and residential applications. Constructed with durable, corrosion-resistant materials, it ensures longevity and dependable operation. The unit features an optimized impeller design and an efficient motor to deliver high performance when pumping water, chemicals, and other liquids.

Key Features

Compatible Liquids

- Water
- Chemicals
- General Liquids

Suitable Applications

Industrial, Commercial, Residential

Technical Details

Build Quality

Corrosion Resistant • Durable Construction

Design Features

- Efficient Motor
- Optimized Impeller Design
- Robust Housing
