

Fluid Transfer Centrifugal Pump

This centrifugal pump is designed for fluid transfer applications. It features flanged connections for inlet and outlet.

Product Overview

Industrial Fluid Transfer Solution

This centrifugal pump is engineered for efficient fluid transfer in demanding industrial environments. Featuring a robust electric motor coupled with a durable pump casing, it utilizes centrifugal force to ensure consistent flow rates. The unit is equipped with standard flanged connections, facilitating seamless integration into existing piping systems for reliable operation.

Technical Specifications

Application Suitability

- General Fluid Transfer
- Industrial Process Pumping
- Liquid Circulation Systems

Pump Type	Centrifugal
Connection Interface	Flanged
Design Features	Electric Motor Driven, Base Mounted, Industrial Grade
