

Fluid Transfer Centrifugal Pump

This centrifugal pump is designed for a variety of fluid transfer applications. It features a robust construction with a metallic pump housing and a powerful electric motor, ensuring reliable performance and durability.

Product Overview

Reliable Fluid Transfer Solution

This centrifugal pump is engineered for efficient fluid transfer across agricultural, industrial, and domestic applications. Featuring a robust aluminum pump body and a durable iron casting motor housing, it is built to withstand demanding environments. Designed with portability in mind, the unit includes an integrated handle for easy transport and setup, ensuring reliable performance wherever fluid movement is required.

Technical Specifications

Maximum Head (H.max)

50 m

Max Head

Maximum Flow Rate (Q.max)

10 m³/h

Max Flow

Construction & Materials

Body Materials

- Aluminum pump body
- Iron casting motor body
- Iron casting impeller

Shaft Material Options

304 Stainless Steel, 45# Steel

Electrical & Configuration

Phase Configuration

Single Phase • Three Phase

Features

Portability

Yes
