

Fluid Transfer Centrifugal Pump

This centrifugal pump is designed for efficient fluid transfer. Its durable construction ensures long-lasting performance in various industrial applications.

PN-205

Product Overview

Industrial Fluid Transfer Solution

The PN-205 is a robust centrifugal pump engineered for high-efficiency fluid transfer across diverse industrial applications. Its durable construction ensures long-lasting performance, while the compact footprint facilitates straightforward installation and maintenance. Designed to deliver consistent flow rates and reliable pressure, this unit optimizes overall system performance in various operating conditions.

Technical Specifications

Model Number	PN-205
Design Highlights	Compact Design, Durable Construction, Easy Installation

Performance

Performance Metrics

1 High

Flow Consistency

1 High

Pressure Stability

Application

Operating Suitability

- Industrial fluid transfer
- Various operating conditions
- Wide range of fluid types
