

# Fluid Transfer Centrifugal Pump

This centrifugal pump is designed for fluid transfer applications. It features flanged connections for easy integration into piping systems and is suitable for various industrial and commercial uses.

## Product Overview

### Industrial Fluid Transfer Solution

This centrifugal pump is engineered for reliable fluid transfer in diverse industrial and commercial environments. It features a robust, durable construction with a specialized housing design to withstand demanding operational conditions. Equipped with flanged connections, the unit allows for seamless and secure integration into existing piping systems, ensuring efficient fluid movement.

## Technical Specifications

### Suitable Applications

- Industrial fluid transfer
- Commercial fluid movement
- Piping system integration

Model Number	SMF 32/160B-1
Design Features	Centrifugal, Flanged Connections, Robust Construction
