

Fluid Transfer Pump

This compact pump is designed for various fluid transfer applications. It features durable construction with a blue painted exterior and brass components for corrosion resistance.

Overview

Compact Fluid Transfer Pump

This compact and robust fluid transfer pump is engineered for reliability in diverse applications. It features a durable construction with a blue painted exterior and high-quality brass components to ensure excellent corrosion resistance. Ideal for clean water pumping, pressure boosting, and circulation systems, this unit is designed for efficient operation and straightforward installation.

Applications

Suitable Applications

Clean water pumping, Pressure boosting, Circulation systems

Construction

Design Highlights

Corrosion resistant • Compact design • Easy installation

Exterior Finish

Blue painted

Key Materials

Brass components
