

# Fluid Transfer Water Pump

This high-performance water pump is designed for efficient fluid transfer. The robust pump features a durable construction for long-lasting reliability.

## Overview

### Professional Fluid Transfer Solution

This high-performance water pump is engineered for efficient fluid transfer across diverse settings, including civil, industrial, and domestic applications. Its robust construction ensures long-lasting reliability for tasks such as well supply, reservoir management, and garden irrigation. Designed for optimal performance, this versatile pump provides a dependable solution for pressure boosting and general water circulation.

## Technical Specifications

### Maximum Fluid Temperature

**40 °C**

Max Temperature

### Maximum Sand Content

0.25 %

## Electrical Systems

### Power Configurations

Motor Type	Voltage Range	Frequency
Three-phase	380V-415V	50Hz
Single-phase	220V-240V	50Hz

### Motor Design

Rewindable

## Applications

### Primary Applications

Well Supply, Reservoirs, Domestic, Civil, Industrial, Garden Irrigation

## Warranty

### Warranty Period

1 Year
