

# Fluorescent Blackboard Light Fixture

This fluorescent light fixture is designed to illuminate classroom blackboards. It features a white metal housing and reflector to provide even, glare-free light for optimal visibility.

## Product Overview

### Professional Blackboard Illumination

This fluorescent blackboard light fixture is engineered to provide even, glare-free illumination specifically for educational and professional environments. Its design focuses on safety, convenience, and simplicity, featuring a durable white metal housing with an integrated reflector to direct light precisely onto the writing surface. This fixture ensures optimal visibility for lessons and presentations, making it an essential component for modern classrooms and meeting spaces.

## Key Features

### Design Highlights

- Safe and reliable operation
- Convenient installation process
- Simple, low-maintenance design
- White metal housing with integrated reflector

## Application

### Suitable Environments

Schools, Large Offices, Meeting Rooms, Hospitals, Showrooms, Department Stores, Specialty Stores
