

Fluorescent Lighting Electronic Ballast

Electronic ballasts are designed for fluorescent lighting systems. These ballasts ensure stable, flicker-free illumination, energy-saving operation, and extended lamp life.

Product Overview

High-Efficiency Electronic Ballast

This electronic ballast is engineered for reliable performance in fluorescent lighting systems. It features a compact design that ensures stable, flicker-free illumination while promoting energy efficiency and extending the operational life of connected lamps. Designed for straightforward installation, it is fully compatible with standard fluorescent lighting setups.

Technical Specifications

Thermal Ratings

50 °C

Ambient Temperature (Ta)

75 °C

Case Temperature (Tc)

| | |
|---------------|----------|
| Input Voltage | 220-240V |
| Frequency | 50/60Hz |
| Rated Current | 0.15 A |
| Power Rating | 13 W |
