

Fluorescent Tube for Elevator Lighting

Fluorescent tubes provide lighting in elevators. The tubes are energy-efficient and provide a bright, diffused light source.

Product Overview

Reliable Elevator Lighting

These fluorescent tubes are specifically engineered for elevator lighting applications, providing consistent and reliable illumination. Designed with energy efficiency in mind, they deliver a bright, diffused light source that enhances visibility and safety within the elevator cabin. Their durable construction ensures long-term performance in commercial and residential settings.

Technical Specifications

Light Quality

- Bright output
- Diffused light distribution
- Energy-efficient design

Certifications

CE

Physical Attributes

Shape

Cylindrical

Reflective Coating

Yes

Usage

Recommended Use

Elevators • Commercial Settings • Residential Settings
