

Fluorescent Tube Lamp for General Lighting

Fluorescent tube lamps are commonly used for general lighting purposes. They provide a diffused light source and are available in various lengths and wattages.

Overview

General Purpose Fluorescent Lighting

These fluorescent tube lamps are designed to provide a reliable, diffused light source suitable for a wide range of applications. They are versatile enough for use in residential, commercial, and industrial environments. Please note that these lamps require an external ballast to properly regulate electrical current and voltage during operation.

Technical Details

Operating Requirements	Requires external ballast
Light Characteristics	Diffused light source

Application

Common Applications	Commercial, Industrial, Residential, General Lighting
