

Fluorescent Work Light with Cigarette Lighter Adapter

This fluorescent work light is designed for portable illumination. It features a durable fluorescent tube encased in a protective housing and is powered via a coiled cord with a cigarette lighter adapter.

Product Overview

Professional Portable Illumination

This portable fluorescent work light provides reliable illumination for professional and emergency automotive repair tasks. Engineered for versatility, it connects directly to vehicle 12V power outlets via a durable cigarette lighter adapter. The unit features a protective housing and a coiled power cord for flexible reach, making it an essential tool for workshops, roadside assistance, and camping environments.

Technical Specifications

Power Input	12V DC
