

# Fluted Carbon Steel Tart Pan with Removable Bottom

This fluted tart pan is made from heavy-gauge carbon steel for even heat distribution and lasting use. It has a non-stick coating and a removable bottom for simple tart extraction.

## Product Overview

### Professional Grade Tart Pan

This fluted tart pan is crafted from heavy-gauge carbon steel, ensuring even heat distribution and exceptional durability for consistent baking results. Designed for both sweet and savory applications, it features a high-quality non-stick coating that guarantees easy food release and effortless cleanup. The removable bottom design allows for seamless removal of delicate tarts and quiches, preserving their intricate fluted edges.
