

Flyback Transformer for 14-21 inch CRT TVs

Flyback transformer designed for use in 14-inch to 21-inch color televisions. It features a slot-winding construction for efficient energy transfer and reduced electromagnetic interference.

Product Overview

High-Efficiency Flyback Transformer

This flyback transformer is engineered specifically for 14-inch to 21-inch CRT televisions, ensuring optimal performance and picture clarity. Utilizing an advanced slot-winding construction, it provides highly efficient energy transfer while minimizing electromagnetic interference. The unit includes an integrated high-voltage rectifier along with precise focus and screen voltage adjustment capabilities for reliable operation.

Technical Specifications

Construction Type

Slot-Winding

Integrated Features

- High-voltage rectifier
- Focus voltage adjustment
- Screen voltage adjustment

Core Performance

21 inch

Maximum Screen Size

14 inch

Minimum Screen Size

Compatibility

14-inch to 21-inch CRT Televisions
