

Flyback Transformer for Black and White TVs

This flyback transformer is designed for use in 5 to 14 inch black and white televisions. It features slot-winding construction for efficient energy transfer and reliable performance.

Product Overview

Flyback Transformer for Black and White TVs

This high-performance flyback transformer is engineered specifically for use in 5 to 14 inch black and white television sets. It features an advanced slot-winding construction that ensures superior energy transfer and consistent reliability. Integrated with robust high-voltage components, it effectively generates the necessary anode voltage for CRT display operations, making it an essential component for B/W television repair and maintenance.

Technical Specifications

Supported CRT Sizes

- 5 inch
- 14 inch

Winding Design

Slot-winding

Primary Application

B/W Television, High Voltage Generation, CRT Anode Supply

Performance Features

Key Performance Metrics

14 inch

Maximum Supported Diagonal

5 inch

Minimum Supported Diagonal
