

Foam Earplugs for Noise Reduction

These earplugs offer high attenuation for effective noise reduction. Made from soft, slow-recovery foam, they provide a comfortable and secure fit for industrial, construction, and recreational use.

Product Overview

High-Attenuation Protection

These foam earplugs are crafted from soft, slow-recovery PU material, designed for effective noise reduction in various demanding environments. Featuring a tapered shape for a secure and comfortable fit, they are ideal for extended wear in industrial, construction, and recreational settings. Each set is conveniently packaged with 14 individual earplugs to ensure consistent protection.
