

Foam Wheel with Precision Bearing

This foam wheel is suitable for various applications. It features robust construction and a precision bearing for smooth rotation.

Overview

Reliable Flat-Free Mobility

This foam wheel is engineered with high-quality polyurethane tires to ensure consistent performance in demanding environments. Designed to eliminate the inconvenience of flat tires, it offers the bounce and feel of a pneumatic tire while remaining completely maintenance-free. It provides excellent load handling capabilities and non-marking properties, making it an ideal choice for carts, dollies, and industrial equipment.

Technical Specifications

Tire Size	4.10/3.50-4
Material	Polyurethane
Bearing Type	Precision Bearing
