

Foil Heating Mat for Under Laminate Floors

This foil heating mat features fluoropolymer insulation sandwiched between two adhesive aluminum fiberglass mesh layers. It provides comfortable heat for indoor floor heating solutions.

Product Overview

Comfort Heating Solution

This foil heating mat is designed specifically for under-laminate and engineered wood flooring, providing an efficient comfort heating solution for residential and commercial spaces. Featuring a robust, self-adhesive aluminum fiberglass mesh, the system is engineered for quick and easy installation in both new builds and renovation projects. With zero EMF emissions and high-quality fluoropolymer insulation, it ensures a safe, reliable, and long-lasting heating experience.

Technical Specifications

Insulation Material	Fluoropolymer
Connection	Single-end connection cable
