

Foldable Crate Mold

This high-precision crate mold is designed for efficient production of foldable crates. It features a multi-cavity design for increased output and is constructed with durable materials to ensure longevity and consistent performance.

Product Overview

High-Precision Foldable Crate Production

This high-precision mold is engineered specifically for the efficient, high-volume production of foldable crates. Featuring a robust multi-cavity design, it ensures consistent performance and longevity in demanding manufacturing environments. The mold is constructed with advanced materials to deliver precise dimensions and intricate detailing for every crate produced.

Technical Specifications

Application

Foldable Crate • High-Precision

Cavity Configuration

2 cavities

Material Composition

Moldmax 433, Moldmax 434, Moldmax 435
