Overview

Smart Urban Mobility

This foldable electric bike combines minimalist design with high-performance features for an optimized urban riding experience. Built with a sturdy V-shape frame and a powerful 36V brushless motor, it ensures a smooth and reliable commute. The bike features advanced smart capabilities, including remote-controlled locking and alarm systems, alongside a comfortable, ergonomic design for longer rides.

Performance & Power

Performance Metrics

36 V

Motor Voltage

25 km/h

Max Speed

Battery Capacity

10 Ah

Design & Portability

European style geometric design with integrated hidden battery and one-step folding mechanism.

Dimensions

State	Dimensions (L*W*H)
Folding	1110*200*750mm
Riding	1110*500*1025mm

Frame Design	V-shape triangle frame with hidden battery integration
--------------	--
