

Foldable Electric Scooter with Disc Brakes

This electric scooter features a suspension frame and fork, along with front and rear disc brakes. Its 36V 1000W direct drive system provides high efficiency and lowered maintenance.

Overview

Compact Urban Mobility

This foldable electric scooter is engineered for efficient urban commuting and recreational riding. Built with a robust high-tensile steel frame and a powerful 1000W motor, it offers a reliable and comfortable experience for daily travel. The inclusion of a plush gel saddle and advanced suspension systems ensures rider comfort, while the foldable design makes storage and transport convenient.
