Product Overview

High-Efficiency Respiratory Protection

This foldable FFP3 mask is designed for professional respiratory protection against solid and liquid particles of high toxicity. Featuring a horizontal foldable design with an integrated nose clip and foam reinforcement, it ensures a secure, comfortable fit for various industrial applications. Compliant with EN 149:2001+A1:2009 standards, this mask provides a 99% filtration efficiency for reliable safety.

Technical Specifications

Construction Features

- Non-woven synthetic fiber
- Horizontal foldable design
- Integrated adjustable nose clip
- Foam reinforcement under nose clip
- Elastic head straps

Filtration Efficiency

99 %

Standards & Certifications

EN 149:2001+A1:2009, FFP3, CE Certified

Usage Type

Single shift / Single use (no maintenance)

Storage & Environment

Storage Requirements

- Store in a cool, dark place
- Temperature range: +2°C to +55°C
- Relative Humidity: <75%

Usage Guidelines

Recommended Applications

- Sanding of soft wood
- Composite materials processing
- Rust removal
- Putty and plaster work
- Metal drilling, cutting, and grinding
